REFURB WITH FILM

Looking for an alternative refurbishment solution?

Self-adhesive films could be a simple and cost-effective alternative for your interior design projects. Create faux finishes by wrapping existing surfaces, saving landfill and avoiding the disruption of traditional refurbishments.

Looking for an installer?

We have a growing network of fully trained applicators who will be able to supply and install your projects with confidence. This elite group of installers, from fit out, sign and graphics companies, all share the same mission, to be one of the first to uncover exceptional ways to renovate building interiors and exteriors and to tap into the growing market of architectural finishes.

Architextural...

UK'S LARGEST STOCKIST OF ARCHITECTURAL FILM BRANDS.

TRANSFORMING INTERIORS

With eco-friendly materials fast becoming rising stars in the world of interiors, there are multiple benefits of using architectural films and how they can refurbish existing surfaces. Gone are the days when wrapping was exclusive to vehicles; architectural films have opened up a wealth of design possibilities.

SUSTAINABLE SOLUTION

On average, it costs seven times more to rip out and replace interiors. Wrapping with architectural films is a novel way to upcycle existing fixtures and fittings, rather than send to landfill.

MINIMAL DISRUPTION

Architectural films can be applied in situ, with no noise, mess or waste. Little equipment and minimal prep is needed, meaning less downtime and inconvenience for businesses and they can stay open throughout.

The films are lightweight and conformable so they can be heated and stretched around many shapes, corners and contours without the need for edge banding.

APPROVED

All finishes are fire tested and meet building regulations. And as the product is a PVC solution, it is fully water and heat resistant, as well as and hygienic, all of which are important in high-traffic venues such as gyms, bars and restaurants.

APPLICATION INSPIRATION

APPLICATION INSPIRATION

Here's a selection of recent transformations using self-adhesive architectural films. Wrapping existing surfaces is a cost-effective design solution for interior and exterior new building refurbishment projects, these vinyl films realistically recreate the visual effect of natural materials at a fraction of the cost.

OUR BRANDS

Architectural finishes are highly engineered, durable films, designed to look and feel like real-life materials. The films are often applied with heat, by skilled installers, to provide a realistic hardwearing finish. This allows you to create bespoke designs using less expensive materials, by wrapping them to look like authentic marble, wood or concrete.

With hundreds of patterns in stock, the possibilities really are unlimited, making in-vogue design more than achievable with architectural finishes. Mimicking the aesthetics of natural materials, architectural films offer unrivalled choice of on-trend patterns and an alternative method to upcycle existing substrates in an affordable, high-quality finish.

Sustainability

Decal interior Film is one of the most sustainable films in the Architextural portfolio, with all films being PVC free. Decal's PVC free range is the natural choice for those who want to reinforce ecological solutions. Decal's films are a sustainable and safe option for all spaces, respecting the environment and regulatory requirements.

Application

The range also gives space to imagination in interior decoration. Combining aesthetics and design with effectiveness and functionality, it is perfect for those who buy, apply and enjoy. We introduce our textured polypropylene (PP) films, which create new atmospheres and generate new sensations with versatility, safety, resistance, ecology, and easy cleaning.

A set of properties brought together in a single layer structure that makes it possible to idealize houses, offices, hotels, restaurants, shops and many other projects without investing in a total remodelling or making changes.

The finishes

In interior decoration, every detail counts for comfort, and the technical combination of printing and texture in the production of our All Decor 2d films makes the printed design and the deep pore of the relief totally coincident. With 20 different colours and finishes including woodgrain, metallic, stone and leather. Decal All Décor 2d contributes to creating natural and realistic textures.

ARCHITECTURAL FINISHES

Architextural, are part of William Smith Group 1832 and we stock the largest range of architectural films in the UK. Everything you see on the following pages are held in stock and available by the metre.

TECHNICAL SPECIFICATIONS

The use of architectural film has become more prevalent over the last few years as there has been a shift in attitude toward using sustainable solutions and methods within the construction sector.

Wrapping doors or case goods instead of ripping out and sending to landfill is a powerful statement for any stakeholders within a refurbishment scheme.

We recommend you discuss all technical considerations for your project with one of our skilled installation partners. Please contact us to organise a consultation or trial application with a member of our installation network

DURABILITY

Due to the number of finishes available, durability varies between patterns and brands. Cover Styl' finishes typically last 10 years, standard 3M DI-NOC has a durability of 5 years for exterior applications but up to 12 years for indoor use. The specialist exterior range however is expected to last 10 years+ ensuring protection against defects in fading, peeling, discoloration or loss of adhesion.

ABRASION RESISTANCE

Superior to many common wall surfaces such as paint/wallpaper, an equivalent level of HPL. There are additional specialist ranges also available for high traffic areas, or where greater protection is sought.

IMPACT RESISTANCE

Performance is superior to many common wall surfaces such as paint/wallpaper. However, film surfaces can be dented if sufficient force is applied. Impact resistance is highly dependent on the strength of the substrate material onto which it is applied. As it is a vinyl, it offers a degree of cushioning on impact, where harder substrates such as laminates may crack with the same impact. However, the beauty of architectural film, is that any damage over its lifetime can be repaired with an invisible patch, without having to remove or replace any expensive panels.

CLEANING

Architectural films are made from durable PVC, meaning they are wipeable and practical. They are also resistant to staining by common substances e.g. food or household cleaners. Full technical spec sheets are available on request.

FIRE CERTIFICATION

Architectural films meet all building and IMO regulations with fire certifications available across the range. Should you require specific information by patterns, we can put you in touch with our technical department. Fire test results vary by finish and application substrate, with most classified as class B or C with low dripping and emissions.
